

for pressure-sensitive labels

Clear - Surprise - Original - Super

Clear

Labeller with a speed of 20 mt/minute

Clear is the small labeller ideal for the packaging lines. The technology and conception are those of the larger industrial labellers: Clear is robust, precise, reliable. Beside these characteristics it has a compact shape, which makes it easier to install it in the different production lines, thus meeting the increasing need for flexibility. Clear applies labels up to

130 mm wide at a speed of 20 metres/minute. A potentiometer helps to adjust speed in the manual mode.

Clear, equipped with the optional devices manufactured by Etipack, such as printing units, micro regulations, encoders, is the answer to the need of industrial labelling.

Technical specifications

Dispensing speed	max 20 mt/min
Motorization	stepper motor
Compressed air	6 bar with printing unit
Dispensing width	min 8 mm, max 128 mm
Outside reel diameter	280 mm
Inside reel diameter	40-75 mm
Machine size	length 1015, width 543, height 553 mm
Power supply	115/230/240 Volt, 50-60 Hz
Electrical input	100 W
Electrical protection	Ip55
Noise level	70dB
