# Drintec

## Transfer foil print unit with wide print area

Drintec is a print unit for transfer foil overprinting of variable data and can reach a speed of 6,000 pieces an hour with labels 50 mm wide.

The code, which is printed with a resolution of 8 dots/mm on a print area of up to 104 x 157

mm, can be easily and rapidly set in real time on the keypad. A compensator roller makes it possible to set different speeds for printing and dispensing.

## Technical specifications

Type of impression	transfer foil
Print area	104 x 157 mm
Speed	max 6,000 pcs/hr
Power supply	115÷230 V, 50 – 60 Hz single-phase
Electrical input	250 VA
Machine size	length 310 mm, width 305 mm, h 370 mm
Weight	19 kg
