

# Europrint

## Hot foil print unit with reduced print area

The Europrint hot print unit is for printing pressure-sensitive labels on a print area of up to 38 mm x 20 mm prior to use in the production line at a speed of 10,000 pieces/hour. The reel holder for foil up to 244 metres in length permits a high level of autonomy and reduces the need for reel changes.

# GSCE 46

## Hot foil print unit with reduced print area

The GSCE 46 hot foil print unit overprints variable texts and bar codes on pressure-sensitive labels of 38 x 25 mm prior to applying them to the product at a speed of 10,000 pieces/hour. The more powerful version, the GSCE 46 VT, attains a record speed of 24,000 pieces/hour. Thanks to using foil on rolls of up to 244 m in length, a high level of autonomy is permitted during production. The foil loader is removable, thus ensuring that roll-changing time is kept to a minimum.

### Technical specifications

	<b>Europrint</b>	<b>GSCE 46</b>
Type of printing	Hot foil	Hot foil
Print area	30x20 mm	38x38 mm GSCE 46, 38x25 mm GSCE 46 VT
Speed	max 10,000 pcs/hr	max 10,000 pcs/hr GSCE 46 max 24,000 pcs/hr GSCE 46 VT
Power supply	From labeller, 50 V dc	From labeller, 50 V dc
Electrical input	400 W	400 W
Compressed air	6 bars	6 bars
Air consumption	0.4 l/cycle	0.4 l/cycle
Machine size	Length 220 mm, width 160 mm h 215 mm	Length 225 mm, width 208 mm h 212 mm
Weight	7 Kg	8 Kg

### Europrint and GSCE 46 accessories

- Support frameworks
- Overprint control
- Type chases, brass types, foil
