

Spider and Jumbo

Transfer foil printers for pressure sensitive labels and tags on reels

Spider and Jumbo are robust and versatile printers, designed for high performances. Spider is available in two versions, for labels and cards of up to 50 mm and 100 mm in width, and a print speed up to 250 mm/sec. Jumbo has a print area width of 160 mm with a maximum speed of 150 mm/sec.

The Spider and Jumbo printers come in right and left versions and this makes their installing in packaging lines easier.

They are equipped with a keyboard for a simple and easy setting of print parameters and they can be fitted with a number of applicators to meet the different packaging requirements. An expansion kit allows to increase the print area width and the speed of composition of character maps. These printers come with an electronic device for controlling foil tension; they exploit switching technology for stabilizing the input current.

Tecnical specifications

	Spider 2	Spider 4	Jumbo
Type of printing	Transfer foil	Transfer foil	Transfer foil
Print speed	max 250 mm/sec	max 250 mm/sec	max 150 mm/sec
